

Heart of Kensington

The goals of the Heart of Kensington Plan are to create:

1. A safe and stable neighborhood where people feel secure in their homes and on the streets and parents can allow their children to play outdoors without fear.
2. A respectful and civil place where people feel like valued citizens, and are more involved and at ease with one another.
3. A place where there are fewer vacant properties, more homeownership and longer term renters, as well as a variety of quality housing that is safe, affordable, and suited to the community's many needs.
4. A vibrant place that enjoys an appropriate mix of quality services and amenities.
5. A distinctive, urban place that people are happy to call home and which businesses seek to serve.
